

## Update Distribution of Rapid Antigen Tests (RATs)

Monday 30 May 2022

Dear Parents/ Caregivers

Over the past couple of weeks, we have been distributing RATs to parents as needed through a drive through pickup service at the front office.

We are now at the point where we are not distributing many now through this process and so to free up the staff that were managing this process, RATs can now be collected in one of two ways:

1. You can come into administration and we can supply them directly to you.
2. If you are symptomatic and cannot come inside the office, please drive to administration and call 9391 6222 and we will bring them out to you.

So far, we have distributed around 10000 RATs to parents so children can be tested and remain at home if sick or they test positive. Parents are entitled to 20 RATs per child enrolled at the school.

Thank you for your support!

Mark Brookes
